AirFit™ F30i
Full face mask

Get back to feeling your best

The benefits of sleep apnea treatment are truly remarkable. Getting a good night's sleep gives you the energy to get back to doing the things you love. But one of the most inspiring things people tell us about starting CPAP is that they're able to start dreaming again.

The new face of freedom

Introducing ResMed AirFit™ F30i, a full face mask with a top-of-head tube connection that stays out of your way so you can move about freely and sleep how you want.

AirFit F30i is also highly rated by full face mask users in a recent study:

4 out of 5 stars for overall seal and comfort¹

The freedom you want, the performance you need

Not only does the innovative design of AirFit F30i let you sleep in different positions, but it's also proven to provide a reliable mask seal that endures throughout the night.² And because it sits low on your face, you can do things like read comfortably in bed with your glasses on.

The UltraCompact mask cushion rests under the nose, which helps prevent next-day red marks, soreness and irritation. With a cushion design that avoids the top of your nose, you can wake up looking and feeling better.

"It felt especially good when hugging my pillow on the side of my face. I like that the air tubing doesn't get tangled since it's completely away from my face."²

- First-time AirFit F30i user participating in a clinical study
