

Less is more

FullLife — a minimal-contact, full-face mask — has less bulk while providing more comfort and convenience.

A revolutionary design makes FullLife a great choice for men and women who need a full-face mask but prefer something more compact with a clear line of sight.

We took a minimalist approach in developing FullLife. We made it smaller and lighter, yet ensured that it is durable. The conventional forehead pad was eliminated to provide a clear line of sight in the process.

We reduced leaks with a dual-textured, grooved cushion that creates a robust seal even with patient movement. Our straightforward, step-by-step numbered headgear system reduces application and removal effort while improving fit. With less noise, FullLife is more comfortable to live with. And with just one faceplate to fit all sizes — plus our FitPack and DuoPack options — FullLife is more comfortable for you as well. Helping you fit 100% of your patients, 100% of the time sometimes means giving you less ... and much, much more.

PHILIPS

RESPIRONICS

Elimination of the forehead pad creates a clear line of vision.

Integrated exhalation port makes operation exceptionally quiet.

One faceplate fits all 3 cushion sizes (S, M, L).

Safety entrainment valve provides quick access to room air if pressure is less than 3cm H₂O.

Swivel quick-release tabs allow the hose to be easily disconnected.

Two 360° swivels allow tubing to move freely.

Branding and size indicators provide easy identification for patients and clinicians.

Chin support band ensures a secure fit and mask stability.

Step-by-step numbered headgear system makes set-up and use easy.

Dual-textured cushion surface aids assembly while preventing mask movement on the face.

Cushion "ribs" add extra stability to the cushion and help prevent leaks into the eyes.

Grooved cushion creates a robust seal that accommodates movement.

SST flap and textured cushion design enhance comfort.
