AirFit™ X30i

CLICK TO LEARN MORE

Stable and reliable sleep therapy

Introducing the **ResMed AirFit™ X30i** oral nasal CPAP mask, designed to let you sleep the way you want to. The oral nasal design offers the coverage of a full face mask, and the stability and seal of a nasal pillows cushion. The tube connects to the frame at the top of your head, keeping it out of the way and allowing you the freedom to sleep in any position.

Cushions may be replaced twice-monthly[†]

Because AirFit X30i is an oral nasal mask, both the oral and nasal pillows cushions may be replaced twice per month.

AirFit™ X30i

1

Keep your mask in top shape with cushion replacements

To help keep your mask in peak condition, both the oral and nasal pillow cushions may be replaced up to twice per month.

2

Enjoy a quieter night's sleep

With QuietAir™ diffused venting, you and your partner will enjoy a less disruptive, quieter night's sleep.

3

Quick release for bedtime breaks

The quick-release elbow makes it easy to disconnect the mask from the tubing if you need to get up at night.

4

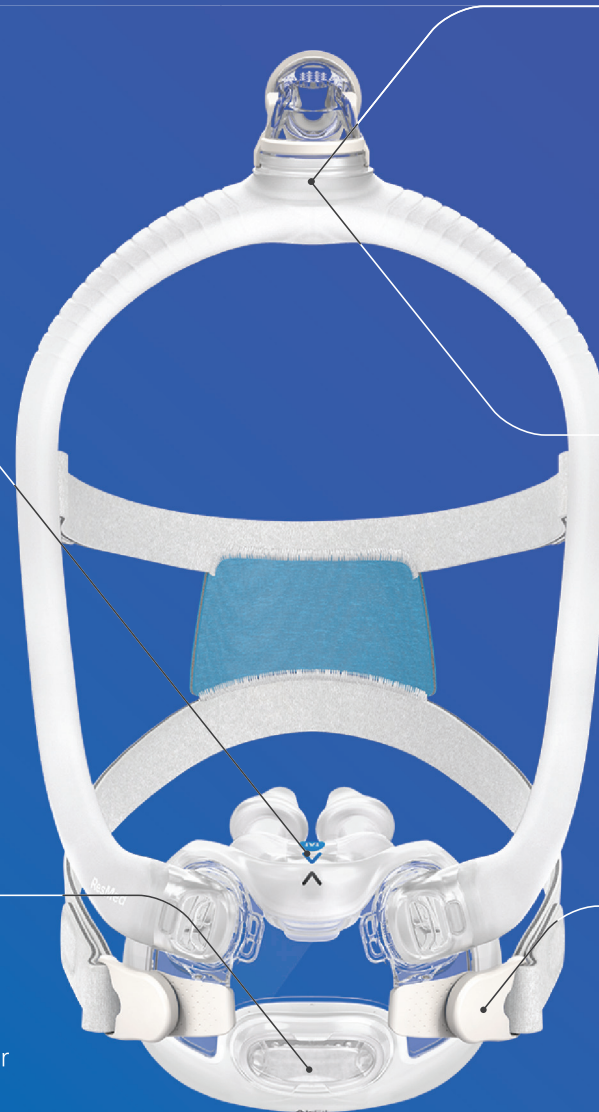

Sleep the way you want

The tube connects to the frame at the top of the head so that it's out of the way, giving you the freedom to sleep in any position without compromising seal performance.

5

Easy to use and remove

The headgear has magnetic clips so you can put on and take off your mask in just two simple snaps.*

*The mask contains magnets that may interfere with certain implants or medical devices. Please refer to the User Guide for complete labeling information, including magnet contraindications and warnings.
