

Softness where you feel it most

The AirTouch™ F30i Clear full face mask is designed to deliver softness right at the seal, where it matters most. Comfort comes built-in, with the ComfiSoft™ fabric cushion resting gently under your nose, replacing the usual rigid plastic with a flexible AdaptiSeal™ design that contours to your face. This combination helps reduce pressure and marks, while adapting as you turn or change position, allowing you to sleep how you want.

Ready to live life in high Res?

It's simple. Better sleep brings your world into focus. Resmed's first full face mask in the AirTouch fabric series is designed to bring you a more comfortable sleep to adapt to your normal bedtime routine.

Experience the Resmed AirTouch F30i Clear full face mask today.

Get support in the palm of your hand

From setup videos to sleep score tracking to tailored coaching content,[‡] Resmed myAir™[†] focuses on helping you enjoy the benefits of therapy. It's like having your own personal sleep coach.*

*The mask contains magnets that may interfere with certain implants or medical devices. Please refer to the User Guide for complete labeling information, including magnet contraindications and warnings.

[†] myAir works exclusively with Resmed Air10 and Air11 PAP machines.

[‡] Coaching entails personalized feedback to encourage continuation of therapy. This is not a healthcare service and is not performed by licensed healthcare providers. Patients are encouraged to speak with their treating clinicians for any clinical symptoms or medical conditions.

[§] Resmed conducted an external crossover (or single-arm) study of the AirTouch F30i Clear mask, using the AirFit F30i as a benchmark. The study involved 33 adults who had been on PAP therapy for OSA (≥ 6 months) and were using other full-face masks, including the AirFit F30i (n=22), AirFit F20 (n=3), AirTouch F20 (n=3), AirFit F30 (n=2), AirFit F40 (n=2), DreamWear Full Face (n=1), and Mirage Quattro (n=1). The study took place in Sydney, Australia, from March 17 to April 7, 2025.

Softness where it clearly matters

The Resmed AirTouch™ F30i Clear full face mask

ComfiSoft™ technology fuses fabric on silicone to create a soft and breathable cushion.

Live life in high Res

The clear choice for everyday sleep therapy

The AirTouch F30i™ Clear is designed to feel soft at the seal, fit easily and work reliably — making it an ideal choice for nightly therapy use.

The combination of the soft, breathable fabric cushion is made to help your skin stay cool, while the flexible seal is designed to adapt to your face to maintain a secure fit as you move during sleep.

Whether you sleep on your side, stomach, or toss and turn throughout your sleep, the AirTouch F30i Clear is designed to keep up with you. The top-of-head tube connection, combined with a 360-degree rotating elbow, keeps the tubing out of sight and off your chest — so it won't pull on the mask or get in your way as you turn or stretch.

The soft cushion combines breathable fabric with flexible silicone to gently adapt to the face.

- 1 UltraCompact ComfiSoft™ fabric cushion with AdaptiSeal™ technology and no pressure points, sitting unobtrusively under the nose
- 2 Flexible frame designed to adapt to different facial profiles and head shapes for an accurate fit the first time
- 3 QuietAir™ venting to help make sleep feel more peaceful for you and your bed partner
- 4 Soft headgear with adjustable sidebands and magnetic clips*
- 5 Top-of-head tube connection and quick-release elbow — makes it easy to disconnect from therapy without removing the mask

"...seals better and is more comfortable."¹
